## COAGUCHEK SYSTEM

### *Did You Know.....*

- AHH has a CoaguChek System to enable nurses to provide PT/INR results quickly while in the patient's home?
- Results are given in one minute? This saves a trip to the lab and eliminates any wait time for lab results. Instead, the AHH Nurse can phone in results immediately to the physician, and order can be adjusted as needed.
- The CoaguChek System requires only a finger stick and one drop of blood?
- Clinical trial studies comparing the CoaguChek system to traditional lab draws show consistent accuracy?
- No more:
  - Venipunctures for obtaining blood.
  - Taking blood specimens to the lab.
  - Waiting up to 24 hours for results!!
