

At Home Healthcare

Home Care Guidelines

Did You Know.....

- There must be a need for one or more of these services:
 - Skilled Nursing
 - Physical Therapy
 - Occupational Therapy
 - Speech Therapy
 - Medical Social Worker
- There must be a skilled need such as:
 - Medication teaching/monitoring
 - Teaching/training patient or caregiver on disease process
 - Exacerbation of disease process
 - Post surgical care
 - Diabetic management
 - Infusion therapy
 - Pain management
 - Cardiac management
 - Catheter care
- Home Care Aide services must be accompanied by a skilled service such as nursing or physical therapy
- **THE PATIENT MUST BE HOMEBOUND**
 - An effort to leave home requires considerable taxing effort due to illness or injury
 - The patient may be able to leave home (with assistance) for short periods of time (i.e. doctor, church, shopping, salons)
 - Homebound status can be a temporary status
