## HOME SIGHT™ Program

### *Did You Know.....*

- 🍏 HomeSight is a comprehensive program developed specifically for treating low vision patients.
- 🍏 The program utilizes the entire range of home health disciplines to coordinate an individualized plan for each patient by effectively addressing the diverse range of considerations associated with low vision therapy:
  - **Home modification** – safety, functionality
  - **Education and training** – management of medications, nutrition
  - **Coping with physical and emotional issues** – personal care and emotional well-being
  - **Preparation for future needs** - independence
- 🍏 Backed by more than 12 years of research, the HomeSight program delivers an innovative approach to low vision treatment by addressing the clinical, functional and psychosocial needs of patients with varying degrees of vision loss.
  - **Independence** –helps to regain a measure of independence which sometimes diminishes with loss of vision causing additional stress and depression
  - **Safety** – reduces the risk of preventable falls, injury, urgent and emergent care
  - **Patient Satisfaction** – offers a revolutionary program to patients to increase ADLs and quality of life
- 🍏 HomeSight is the first step toward giving patients the opportunity to take their lives back from low vision.
